

PLYVENEER® CHEESE LINERS

FORMED TO PERFECTION TO MAXIMIZE YIELD

Since 1970, our lightweight wood veneer cheese liners have been a superior alternative to other inferior options. Designed for maximum strength and durability, they help preserve the delicate texture, flavor, and integrity of your cheese throughout the manufacturing process. Our cheese liners work in all automated case packers and in hand insert applications. From aging and storage to shipping and processing, PlyVeneer®'s cheese liners maximize yield, minimize waste, and enhance your product's presentation—all while reducing packaging costs.

SPECIFICATIONS:

- 100% sustainable wood veneer and Kraft liner board overlay.
- Puncture resistant.
- Available in custom sizes and shapes.
- Reusable for up to 3 uses.

PRODUCT SPECIFICATION	ULTIMATE CRUSH LOAD (LBS)
135 PlyVeneer®	3,784
150 PlyVeneer®	5,000
145 PlyMDF	3,385

WHY PLYVENEER® CHEESE LINERS?

SUPERIOR STRENGTH:

The strength of wood without the weight, PlyVeneer® combines wood veneer and a Kraft liner board overlay to keep your cheese in pristine condition from aging to consumer. Superior vertical strength allows for better stackability without the risk of crushing the product.

COST-EFFECTIVE:

With PlyVeneer® Cheese Liners, your cheese doesn't need to be double packaged to be protected. Reduce packaging expenditures and product deformation due to damage during stacking and aging.

INCREASED VALUE:

Significantly reduce the rate of cheese deformation due to damage during stacking and aging, decreasing the amount of cheese relegated to lower-value uses such as shredding. Preservation of cheese integrity enhances profitability.

ECO-FRIENDLY:

PlyVeneer®'s cheese liners are made in the USA from 100% sustainable and responsibly sourced materials. These liners are durable enough to be reused several times without losing structural integrity.

THE PERFECT PRODUCT PROTECTION OFFERING SUPERIOR STRENGTH AND FLEXIBILITY FOR DIVERSE APPLICATIONS.
