

# SUPERIOR PACKAGING SOLUTIONS

## PLYVENEER® MACHINE GRADE LATH STRIPS

### ENGINEERED FOR RELIABILITY & EFFICIENCY

PlyVeneer® Products proudly offers industry-leading machine grade lath strips, specifically engineered for lumber manufacturers who demand the utmost in quality and performance. Our machine grade lath strips are designed to overcome common challenges such as warping, twisting, and jamming in autofeed systems, which are typical issues with standard lumber laths. By choosing PlyVeneer® machine grade Lath Strips, every client benefits from significantly reduced downtime, smoother operations at stackers, and a safer working environment.

### PRODUCT FEATURES

#### SUPERIOR MATERIAL QUALITY

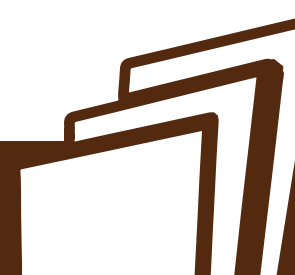

PlyVeneer® machine grade Lath Strips are manufactured from high-quality materials that maintain their integrity under a range of environmental conditions. This quality prevents the common problems of warping and twisting, ensuring consistent performance and reliability.

#### AUTOFEED SYSTEM COMPATIBILITY

Our machine grade lath strips are engineered to perform flawlessly in autofeed systems. Unlike typical lumber lath that can cause jams and operational delays, PlyVeneer® machine grade Lath Strips ensure smooth feeding and stacking, which significantly reduces downtime and boosts productivity.

#### ENHANCED WORKPLACE SAFETY

By eliminating common issues such as jamming and material instability, PlyVeneer® machine grade Lath Strips contribute to a safer work environment. Their reliability and performance help prevent accidents and injuries, making them a responsible choice for conscientious manufacturers.

# BENEFITS

---

Choosing PlyVeneer® machine grade Lath Strips provides several compelling advantages

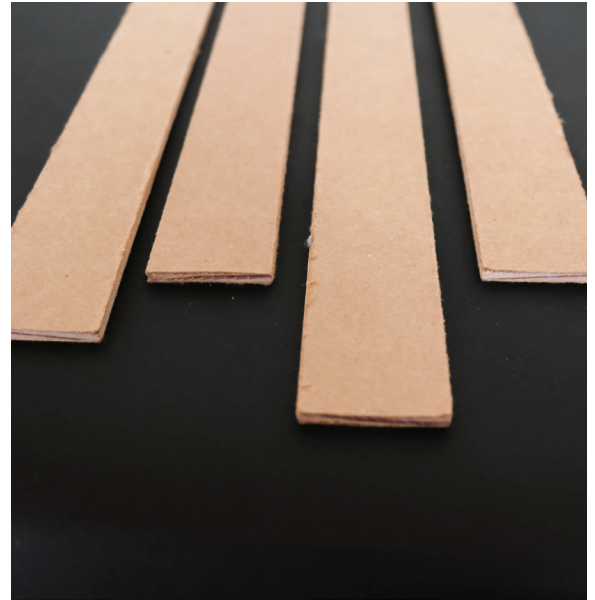

**Cost Efficiency:** Reduce operational costs with lath strips that minimize downtime and maintenance needs.

**Operational Reliability:** Enjoy smoother operations without the frequent interruptions caused by inferior lath strips.

**Enhanced Safety:** Improve safety standards in your production facility with reliable and stable lath strips.

# SPECIFICATIONS

---

- **Material:** Crafted from high-grade materials designed for durability and performance.
- **Customization:** Available in various lengths, widths, and thicknesses to suit specific manufacturing needs.
- **Applications:** Ideal for use in lumber manufacturing settings, particularly where autofeed systems are utilized.
- **Eco-Friendly:** PlyVeneer products are made in the USA from 100% sustainable and responsibly sourced materials.

# APPLICATIONS OF PLYVENEER® LATH STRIPS

---

PlyVeneer® machine grade Lath Strips are incredibly versatile and can be used in a variety of lumber processing applications:

**Stacking and Bundling:** Ideal for use in stacking and bundling operations where stability and reliability are crucial.

**Transport and Storage:** Enhance the safety and efficiency of transport and storage processes in lumber yards.

# CONTACT OUR TEAM

---

Are you ready to enhance the protection of your shipped products with PlyVeneer® machine grade Lath Strips? Contact our team at PlyVeneer® Products today to learn more about how our machine grade Lath Strips can be integrated into your shipping and handling processes. Our experts are prepared to assist you with product options, customization, and detailed advice to ensure optimal protection for your products.

Let's partner to safeguard your products with PlyVeneer® machine grade Lath Strips. At PlyVeneer®, we're committed to delivering solutions that protect your investments and maintain the highest standards of quality and customer satisfaction.
