

SUPERIOR PACKAGING SOLUTIONS

PLYVENEER® 5 PANEL BOX

Designed for superior protection and effortless handling, PlyVeneer®'s 5-Panel Box is the ideal packaging solution for shipping, storage, and transit protection. Crafted from high-quality Douglas Fir with Kraft paper, this durable and lightweight design provides exceptional strength without unnecessary bulk.

Whether you're shipping valuable goods, or heavy automotive equipment, our 5-panel box delivers **easy assembly**, **secure enclosure**, and **reliable performance**. Its flat-pack design optimizes storage space and shipping costs while offering fast, tool-free setup when you need it.

FEATURES/BENEFITS

WHY CHOOSE PLYVENEER® 5 PANEL BOXES?

Choosing PlyVeneer® 5 Panel Boxes can provide several advantages:

Superior Strength: The core of the PlyVeneer® 5 Panel Box is made from durable wood veneer, providing a stronger and more protective barrier than typical corrugated or paper options. This material choice not only improves the structural integrity of the 5 panel boxes and also enhances their capacity to withstand significant pressure and prevent damage.

Cost Effective: Compared to traditional paper-based alternatives, PlyVeneer® is more cost-effective while offering superior protection.

Enhanced Protection: Offers superior strength and durability, ensuring that your products are well-protected against impacts and pressures of shipping.

Eco-Friendly: PlyVeneer® products are made from 100% sustainable and responsibly sourced materials.

Lightweight: Designed for efficiency, our 5 Panel Box significantly reduces shipping weight and material consumption—making it easier to lift, stack, and transport, all while delivering the durability your panels demand.

APPLICATIONS OF PLYVENEER® 5 PANEL BOXES

PlyVeneer® 5 panel boxes are versatile and can be used across multiple sectors:

Automotive: Ideal for safely transporting long trim pieces, moldings, or drive shafts without added bulk.

Oil Field: Perfect for protecting pipe sections, rods, and other elongated components during rugged transit.

Industrial Equipment: Built to handle oversized or narrow parts like rails, guides, or housings with ease and efficiency.

And Many More: A smart solution for any industry needing lightweight, secure packaging for long, hard-to-fit items.
